

State of Alaska FY2008 Governor's Operating Budget

Department of Public Safety Alaska Criminal Records and Identification Component Budget Summary

Component: Alaska Criminal Records and Identification

Contribution to Department's Mission

Maintain and provide criminal record and identification information.

Core Services

Serve as the state's central repository for criminal records; maintain Alaska's criminal history, fingerprint, and photograph databases.

Perform quality control audits that assure the completeness and accuracy of criminal history records maintained by the repository. Corrections are made to inaccurate or incomplete records, as necessary.

Provide direct services to federal, state, and local police, courts, corrections, and prosecutors by verifying the identity of all newly arrested individuals through fingerprints, and making identification on latent crime scene fingerprints. Alaska's Automatic Fingerprint Identification System (AFIS) records include over 2,700 latent fingerprints from unsolved crimes. Training in fingerprinting techniques is also provided to correctional booking officers and vendors around the state.

Provide criminal history background checks to authorized non-criminal justice employers, organizations, and individuals to screen candidates for work with children, vulnerable adults, or for other sensitive positions.

Provide Alaskan criminal justice agencies with access to the National Crime Information Center (NCIC) and the National Law Enforcement Telecommunication System (NLETS) by serving as the CJIS Systems Agency (CSA). CSA responsibilities include determination of agency access levels according to state and federal laws and policies via user agreements, and ensuring that all agencies comply with these laws, policies, and directives. An employee must audit each agency every two years to ensure this compliance, and maintain documentation files. This employee is also responsible for providing system training.

Provide system security for over 300 agencies using APSIN terminals, of which about 212 agencies have NCIC/NLETS access, by distributing information about system updates, administering certification testing for over 3,100 operators, and establishing security profiles and access authority for users. Investigate allegations of operator misuse of the criminal history data and violations of security procedures and policies.

Assist in identification through DNA by maintaining a DNA flag in the Alaska Public Safety Information Network (APSIN) indicating those persons required to provide a DNA sample based on a criminal convictions, and those for whom a DNA sample and record are available through the state crime laboratory.

Represent the state as a member of the National Crime Prevention and Privacy Compact Council and a separate NCIC Western Region working group to address laws and policies involving national criminal background checks and national criminal justice information systems issues. Staff also represent the state as a member of the NLETS Operational Committee to address laws, policies, and communication networks involving criminal justice, law enforcement, and Homeland Security related issues. They also represent the state as a member of SEARCH (The National Consortium of Justice Research and Statistics), and participate in policy and procedural development at state, regional, and national levels.

Administer the Uniform Crime Reporting (UCR) program in Alaska. This includes the collecting, compiling, and publishing of standardized crime data from across the state, maintaining UCR data, and responding to external requests for Alaska crime statistical information. Crime data reported by participating police agencies is forwarded to the FBI for consolidation with other states' data to project national crime trends.

Maintain file of copies of all DMV-issued driver's licenses and identification cards used by law enforcement investigators requiring photographic identification of suspects. This unit also receives booking photographs of arrested subjects. The three employees in this section maintain over 2,000,000 DMV photos and 300,000 booking photographs.

Maintain Alaska's central Sex Offender Registry (SOR) program. Currently, information regarding over 4,100 sex offenders is available to the public. Of these 4,100 registrants, over 2,000 are required to verify their registration information quarterly. Each month, the registry receives and processes approximately 1,000 registration forms from sex offenders. Currently, the registration requirements and duration of the registration responsibility of over 300 sex offenders is being evaluated. This requires the research of each offender's sex offense conviction(s), including the obtaining of disposition information from state and nationwide courts and law enforcement agencies, and the evaluation of the data received to determine if and for how long the offender is required to register while in Alaska.

Administer the licensing programs for civilian process servers (CPS), security guards, and security guard agencies. Thirty-four security guard agencies are currently licensed with approximately 1,370 active security guards - both armed and unarmed, and approximately 86 civilian process servers. An average of 85 security guard and 5 civilian process servers' new and renewal license applications are processed per month. Each application requires a background investigation and review of delinquent student loans before issuance of the license. In addition, employees review state and federal criminal justice responses to every new application, and process an average of 50 civilian process server and 400 security guard actions per month, including complaints, transfers, status change requests, and insurance reviews, as well as weapons' qualifications for security guards only.

Administer the permitting program for Alaska Concealed Handgun Permits (CHP). There are currently 11,280 active Alaska Concealed Handgun Permits issued to Alaska citizens. An average of 85 new and renewal permit applications are processed each month. Each application requires a check of state and national criminal history files, as well as other databases that may provide data pertaining to the eligibility of the applicant to possess a handgun. In addition, employees process an average of 85 permit holder actions per month; including suspensions, address change requests, name change requests, and revocations due to the holder's disqualification from possessing a handgun.

End Results	Strategies to Achieve Results
<p>A: Criminal history records are complete, accurate, and timely.</p> <p><u>Target #1:</u> 100% of Alaska criminal history records, disposed within the last year, in the state repository are supported by positive fingerprint identification.</p> <p><u>Measure #1:</u> % of Alaska criminal history records, disposed within the last year, in the state repository that are supported by positive fingerprint identification.</p> <p><u>Target #2:</u> 100% Arrest/charge information is received by the repository within 5 working days.</p> <p><u>Measure #2:</u> % of arrest/charge information received by the repository within 5 working days.</p>	<p>A1: Request arrest fingerprint cards for all cases involving felony convictions and the collection of DNA samples.</p> <p><u>Target #1:</u> Arrest fingerprint cards are requested for 100% of all cases involving felony convictions and the collection of DNA samples disposed within the last year.</p> <p><u>Measure #1:</u> % of arrest fingerprint cards requested for which fingerprints were obtained prior to conviction or collection of a DNA sample.</p>

<p>C: State and national criminal justice information is available to state and private entities for use in determining employment or licensing eligibility.</p>	<p>C1: Improve workflow process to include card scan and computerized criminal history interface.</p> <p><u>Target #1:</u> 100% of card scan and computerized criminal</p>

Target #1: State and national criminal justice information is released to authorized entities within 30 working days of receipt of the request.

Measure #1: Average number of working days from receipt to dissemination of state and national criminal justice information.

history (CCH) interface testing and troubleshooting completed by the end of FY2006.

Measure #1: % of progress towards completion.

Major Activities to Advance Strategies

- Develop and implement a structured training program in cooperation with DOC on inked and live scan fingerprint techniques.
- Measure and address success on an on-going basis through routine audits.
- Identify individuals who are out of compliance with sex offender registration requirements.
- Coordinate with AST to locate out of compliance sex offender registrants.
- Assure that information posted to the national sex offender registry includes most current information available on each registrant.

FY2008 Resources Allocated to Achieve Results

FY2008 Component Budget: \$5,226,100

Personnel:

Full time	39
Part time	0
Total	39

Performance Measure Detail

A: Result - Criminal history records are complete, accurate, and timely.

Target #1: 100% of Alaska criminal history records, disposed within the last year, in the state repository are supported by positive fingerprint identification.

Measure #1: % of Alaska criminal history records, disposed within the last year, in the state repository that are supported by positive fingerprint identification.

% of Alaska Criminal History Records Supported by Positive Fingerprint Identification (fiscal year)

Fiscal Year	YTD Total
FY 2000	66%
FY 2001	70%
FY 2002	70%
FY 2003	73%
FY 2004	68%
FY 2005	74%
FY 2006	73%

Analysis of results and challenges: The table shows the percentage of disposed criminal charges added during the stated fiscal year for which positive fingerprint identification was made. Higher percentages by fiscal year indicate improved compliance with AS 12.80.060 (Fingerprinting). Although compliance with AS 12.80.060 has improved since 1999, 100% compliance has not been met. During FY2007, existing live scan systems will be replaced and new systems will be installed in at least one additional Department of Corrections' booking facility and at least two local police departments. This should not only increase the number of arrest fingerprint card submissions, but also improve the timeliness of those submissions.

Target #2: 100% Arrest/charge information is received by the repository within 5 working days.

Measure #2: % of arrest/charge information received by the repository within 5 working days.

% of Arrest/Charge Information Received via Fingerprint Card Submission within 5 Working Days (fiscal year)

Fiscal Year	YTD Total
FY 2000	30.2%
FY 2001	38.6%
FY 2002	38.2%
FY 2003	30.6%
FY 2004	67.7%
FY 2005	64.5%
FY 2006	70.5%

Analysis of results and challenges: The Records and Identification Bureau monitors and audits the quality and timeliness of fingerprints and demographic data submitted by booking agencies, and provides instruction to those requiring additional training on the proper completion of arrest fingerprint cards. There has been significant improvement in the timely receipt of fingerprint-based arrest/charge information since FY2003 (31% to 71%).

During FY2007, existing live scan systems will be replaced and new systems will be installed in at least one additional Department of Corrections' booking facility and at least two local police departments. This should not only increase the number of arrest fingerprint card submissions, but also improve the timeliness of those submissions.

A1: Strategy - Request arrest fingerprint cards for all cases involving felony convictions and the collection of DNA samples.

Target #1: Arrest fingerprint cards are requested for 100% of all cases involving felony convictions and the collection of DNA samples disposed within the last year.

Measure #1: % of arrest fingerprint cards requested for which fingerprints were obtained prior to conviction or collection of a DNA sample.

% of Felony Arrest Fingerprint Cards Requested for which Fingerprints were Obtained (fiscal year)

Fiscal Year	YTD Total
FY 2005	44%
FY 2006	63%

Analysis of results and challenges: AS 12.80.060 requires fingerprints of offenders to be obtained and submitted to the repository (Records & Identification Bureau). This requirement ensures the completeness and accuracy of individuals' arrest records, and nationwide availability for criminal justice purposes.

A percentage (37% in FY2006) of arrestees' fingerprints is not obtained on new charge(s) for a variety of reasons (e.g., the arrestee is cited and released, is too intoxicated for his/her fingerprints to be obtained or other reasons). When the repository receives felony dispositions to these cases and it is determined that the fingerprints of the defendant were not taken for that charge, the correctional facility housing the defendant or the probation officer (if the defendant is not in custody) is contacted and fingerprints of the defendant are requested.

This target ensures that the most serious offenders (felons and those required to submit DNA samples) are more likely to be positively identified based on the submission of their fingerprints. In FY2006, 264 sets of fingerprints were requested from correctional facilities. The repository received fingerprints of 167 of those individuals.

B: Result - Information regarding statewide sex offenders is available to law enforcement and the public.

Target #1: 100% of sex offender registrations are available on-line.

Measure #1: % of registered sex offender registrations that are available on-line.

% of Registered Sex Offender Registrations that are Available On-line (fiscal year)

Fiscal Year	Known Sex Offenders	Requiring Research	Percentage Total
FY 2005	4958	234	95.28%
FY 2006	5174	224	95.67%

This is measured by comparing the total number of known sex offenders in Alaska to the number of offenders whose records require additional research to determine registration duration or other issues.

Analysis of results and challenges: In nearly every case in which an offender moves into Alaska from another state, additional information must be obtained in order to determine the comparable Alaska statute for registration requirements. Program analysis and development has resulted in the more efficient completion of research required to ensure accurate information on the Sex Offender Registration web-site, and has reduced the number of offender's convictions requiring research prior to posting on the web-site.

B1: Strategy - Ensure sex offenders known to the Department of Public Safety have provided required information.

Target #1: 100% of sex offenders known to the department submit required documentation on quarterly or annual basis per AS 12.63 (Registration of Sex Offenders).

Measure #1: % of sex offenders in compliance with law.

% of Sex Offenders in Compliance (fiscal year)

Fiscal Year	Known Sex Offenders	Offenders in Compliance	Percentage Total
FY 2005	4958	4480	90.35%
FY 2006	5174	4793	92.64%

Analysis of results and challenges: The department works in coordination with local law enforcement agencies to attempt contact with those sex offenders who are out of compliance. This contact has resulted in a higher compliance rate. During FY2006, various law enforcement officers statewide actively attempted to locate non-compliant sex offenders, with some success.

C: Result - State and national criminal justice information is available to state and private entities for use in determining employment or licensing eligibility.

Target #1: State and national criminal justice information is released to authorized entities within 30 working days of receipt of the request.

Measure #1: Average number of working days from receipt to dissemination of state and national criminal justice information.

Average Number of Working Days from Receipt to Dissemination of Criminal History Information (fiscal year)

Fiscal Year	YTD Total
FY 2000	15
FY 2001	35.3
FY 2002	18.6
FY 2003	11
FY 2004	18.8
FY 2005	24.0
FY 2006	47.4

Analysis of results and challenges: Timeliness of record dissemination is dependent on the number of requests received and staffing levels. During FY2006, the Records and Identification Bureau experienced extended staff vacancies in two Alaska Automated Fingerprint Identification System (AAFIS) Operator positions. This created a significant backlog in fingerprint processing. Since all three AAFIS Operator positions are now filled, backlogs will be reduced, resulting in an improvement in the processing time of background checks. Additionally, turnaround time will improve when the computerized criminal history (CCH) and Automated Fingerprint Identification System (AFIS) interface is fully implemented in FY2007.

C1: Strategy - Improve workflow process to include card scan and computerized criminal history interface.

Target #1: 100% of card scan and computerized criminal history (CCH) interface testing and troubleshooting completed by the end of FY2006.

Measure #1: % of progress towards completion.

% of Testing and Troubleshooting Completed (fiscal year)

Year	YTD Total
2006	75%

Analysis of results and challenges: Testing of this new workflow process is dependent on workload and staffing levels in both the Criminal Records and Identification and APSIN (Information Systems) sections within the Department of Public Safety. Staffing issues and system problems resulted in continued efforts to complete the card scan and CCH interface testing and troubleshooting. Significant progress was made during FY2006, and the entire card scanning process was rewritten, which will reduce data entry time. Concentrated efforts will be made in FY2007 to finish and implement both card scan and CCH programs. It is anticipated that the automated processing of employment background checks will be implemented by December 2006.

Key Component Challenges
Complete Automated Internal Workflow Processing

The integration of the Automated Fingerprint Identification System (AFIS), the Alaska Public Safety Information Network (APSIN), the NEC LS-21 live scan booking stations located at the three most populated correctional facilities and the Anchorage Courthouse, and the FBI Integrated Automated Fingerprint Identification System (IAFIS) will result in more rapid identification of criminals while also reducing manual intervention requirements. Integration of these systems is complex and critical. Final workflow automation should be completed during FY2007. This automation will also include the electronic submission of applicant fingerprints from the newly formed Background Check Unit of the Department of

Health and Social Services, Division of Public Health. This newly created unit is centralizing all background checks required by their department for a variety of purposes, and hopes to simplify the current process of making licensing determinations for health care workers statewide.

Continue to Monitor, Assess, Recommend, and Adopt Strategies to Address National Initiatives

In light of September 11, 2001, new laws such as the USA PATRIOT Act have required constant monitoring, assessment, and implementation activities. Laws such as the Brady National Instant Check System (NICS), Violence Against Women Act (VAWA), state and federal Sex Offender Registration Acts, and numerous other state and federal laws require constant monitoring to assure compliance and public safety.

In July 2006, Congress passed the Adam Walsh Child Protection and Safety Act of 2006 (P.L. 109-208), a dramatic overhaul of the nation's sex offender registration laws. The State of Alaska will need to amend its Sex Offender Registration law (AS 12.63) to incorporate mandates in this bill. This law will require changes to policy and procedures not only for the Sex Offender Registry, but also for law enforcement and corrections agencies statewide.

Significant resources have already been applied to validating, verifying, and notifying sex offenders of his/her sex offender registration requirements. Additionally, resources have been spent identifying and tracking non-compliant sex offenders in order to ensure they are charged with failure to register as a sex offender, failure to comply with the sex offender registration requirements or both. Existing resources cannot conduct this labor intensive process in a timely manner. Consequently, we are asking for an additional Criminal Justice Technician I to improve the completeness, accuracy, and timeliness of sex offender registration information. Without this additional staffing, the completeness, accuracy, and timeliness of sex offender registration information will suffer, as will, consequently, the safety of the public. Implementation of specific provisions of the Adam Walsh Child Protection and Safety Act of 2006 will also require additional resources because offenders will be required to register in person, submit palm print impressions, and potentially, register more often for an extended period.

Improve Criminal Record Completeness and Accuracy

This component is responsible entry and updating of arrest, prosecution, and disposition information in the APSIN criminal history record repository and the NCIC Interstate Identification Index (III). The volume of criminal fingerprint cards received over the last 10 years has increased 55 percent, and the number of requests for criminal history background checks for employment or licensing purposes has increased over 120 percent. Completeness and accuracy of information provided to criminal justice agencies and employing/licensing agencies is essential.

Historically, the data quality received on criminal fingerprint cards has been poor. During FY2006, approximately 51 percent of all fingerprint cards received required some manual correction. Each transaction requires manual intervention and correction before processing and record updating may proceed.

As the electronic submission of fingerprints increases, an error correction system has been developed to capture and hold fingerprint card transactions with apparent discrepancies as they are processed electronically through the repository. This process will eventually significantly improve the timeliness of processing of fingerprint cards allowing for the immediate availability of criminal charge information to law enforcement and potential employers.

However, existing backlogs in both the manual entry of criminal charge information from arrest fingerprint cards and criminal case disposition information precludes existing staff from manning this system without impacting data entry on incoming court disposition documents. (Currently, there is a two month backlog in fingerprint card processing and a six month backlog in court disposition processing.) Consequently, we are requesting the addition of a Criminal Justice Technician I to identify and resolve data issues with electronically submitted fingerprint card transactions. This will enable us to concentrate our resources on reducing and eliminating the existing backlog in the entry of court disposition information.

Significant Changes in Results to be Delivered in FY2008

Decrease in Applicant Processing Time

Processing time to complete state and national fingerprint based criminal history background checks increased during FY2006. This was due to increased workload coincident with critical position vacancies. Currently, the critical position vacancies have been eliminated, and processing time is slowly being reduced. It is anticipated that the implementation of the automated workflow processing will significantly reduce fingerprint card processing time. Once the backlog is eliminated, existing staffing resources will be redirected to the analysis and entry of disposition information into the criminal history repository.

Continued Focus on Accuracy and Timeliness of Sex Offender Registry

The structural reorganization and application of additional personnel resources to the sex offender registry will continue to improve the completeness, timeliness, and accuracy of information maintained by the sex offender registry. The continued application of these personnel resources will continue to improve data quality. The registry will work with state and local law enforcement agencies to identify and locate offenders who are out of compliance with registration requirements.

Major Component Accomplishments in 2006Criminal Justice Information Audits

A Byrne federal sub-grant award was used to administer the department's criminal justice information audit system in compliance with AS 12.62.150 and federal laws and policies. An annual report of criminal repository audits and statistics was published.

The component applied for and received a National Criminal History Improvement Program (NCHIP) grant award to identify, research, locate, and update dispositions missing from the repository.

Improved Compliance with the Mandatory Fingerprinting Law (AS 12.80.060)

Seventy-four percent of all new criminal cases disposed of during FY2005 were supported by positive fingerprint identification. This is a six percent improvement over FY2004.

Improved Availability of Sex Offender Information on the DPS Web Site

Due to structural reorganization and additional personnel resources, over 95 percent of all sex offender data is available to the public on the DPS web site. Additional resources will continue to be applied to the project of determining registration requirements in a timely manner, with the goal of reaching 100 percent posting of all known sex offenders in the state.
